

How to setup eduroam on your phone

Option 1: Using the geteduroam app

1. **Connect to the internet:** Use your cellular data or a temporary visitor Wi-Fi.
2. **Download the app:** Install **geteduroam** from the Google Play Store or the Apple App Store.
3. **Select your school:** Open the app, search for your university or institution, and select it from the list.
4. **Log in:** Enter your full university email address (or student ID) and your university account password.
5. **Connect:** The app will install the secure profile and connect your phone to eduroam.

Option 2: Using the eduroam CAT Website

1. **Visit the website:** Go to cat.eduroam.org on your phone's browser.
2. **Download installer:** Click the blue button to download the eduroam installer and choose your home institution.
3. **Install profile:** Open the downloaded file. Follow the prompts to install the security profile in your phone's settings.
4. **Enter credentials:** Type in your school login details when prompted
